

March 19, 2020

The health and safety of our employees, patients, clients and community are a priority for the Veterinary Center of Liberty. As COVID-19 continues to spread locally we want to encourage our clients to only seek veterinary care for essential animal health concerns with a sick or injured patient. Essential preventative care is also important for a young pet just developing its immune system, we will need to continue all puppy/kitten vaccine protocols. Your established pet needs to stay current on monthly heartworm/intestinal parasite and flea/tick prevention.

The Veterinary Center of Liberty is asking families to postpone annual wellness exams and elective surgeries.

We are suspending our grooming, bathing and nail trim services temporarily. We will evaluate weekly and determine when it is okay to start opening appointments again. Please watch our Facebook feed and our website's "Frequently Asked Questions" for updates.

We are also asking for only families who NEED daycare services to come for Dogs Unlimited Daycare. If your dog is okay staying at home, we encourage this...we are trying to eliminate as much foot traffic as possible to the Veterinary Center.

We are available for any questions. If you need a refill of a medication or a preventative product let us know, we can help! Please don't hesitate to call or send us an email.

Thank you for your help and understanding. These are new and challenging times which we are all facing together.
